### **DETAILED ACTION**

Applicant's election of Group III, claim 6 and SEQ ID NO: 2 in Paper No. 17 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

#### ***Specification***

The word "invention" is misspelled in the specification, p. 4, line 26.

#### ***Claim Objection***

Claim 6 is objected to as dependent upon a claim withdrawn from further consideration. Please rewrite claim 6 in the appropriate independent format.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 6 is rejected under 35 U.S.C. 102(b) as being anticipated by Ho et al. (The Journal of Biological Chemistry, V. 270, N. 34, pp. 19898-19907 (1995)). Ho et al. teach a method comprising contacting a polypeptide comprising SEQ ID NO: 2 (Fig. 1 and see copy of sequence alignment) and detecting the binding activity of the polypeptide with calcineurin in the presence and absence of FK506, an inhibitor of the interaction between calcineurin and NFATC3 (Fig. 8;

Art Unit: 1653

p. 19899, col. 1, lines 1-5; and p. 19905, col. 2, lines 1-6). Thus, all of the elements of claim 6 are taught by Ho et al. and claim 6 is anticipated under 35 U.S.C. 102(b).
